Families for Effective Autism Treatment, Inc. (FEAT) is a non-profit organization of parents and professionals established in 1994 and designed to help families with children who have received the diagnosis of Autism Spectrum Disorder (ASD), including Autism, Pervasive Developmental Disorder (PDD), or Asperger's Syndrome. In the beginning, FEAT ignited change. Children were not properly diagnosed prior to the age of 6, they received minimal services not geared to the needs of children with autism and intensive intervention was not an option in Southern Nevada. Today FEAT's principles of helping all children in Southern Nevada are still very much alive. Early diagnosis and appropriate services are now possible. Support and empowerment exist with the help of FEAT.
